Introduction

This Statistical Bulletin 06 /2011 is an electronic publication containing only 50 pages of the 331-paged detailed print-version census result report entitled ***Volume I Report on 2009 Population And Housing Census: Basic Tables and Census Description***. Volume I is the first of two major volumes covering the 2009 Solomon Islands population and housing census. The second, which will be released at a later date, is ***Volume II Report on 2009 Population and Housing Census: Analyses***. The release of the detailed results follows on from preliminary result released in November 2010; one year after the census enumeration was conducted in November 2009.

This publication, presents Part 2 of the main report (***Volume I Report on 2009 Population And Housing Census: Basic Tables and Census Description***) and as indicated above, contains only 21 tables of the census result, and as such includes 1 Summary Table, which presents the summary of the questionnaire of the Solomon Islands 2009 population and housing census, 6 Tables on Population Characteristics and 14 Tables on Household Characteristics. The tables are processed with the assumption that they can be used by a wide range of audience; however they are specifically meant for users with some statistical background such as planners, researchers, specialists, and donor representatives.

The set of tables presented here adheres to United Nations Principles and Recommendations for Population and Housing Censuses and continue to maintain the standard of comparability with the previous censuses. Though there may have been slight changes to the numbering and ordering of the tables in each group, as well as situations where the titles may have been changed due to the structure and the format of the tables processed. It is important to note that table numbering starts with a ‘P’ for Person tables and ‘H’ for Household tables.

The contributions of many people and organizations both in and outside of Solomon Islands towards the successful accomplishment of the 2009 Population and Housing Census dovetailed work-plan ought to be acknowledged. These include; the Minister of Finance and Treasury, under whose jurisdiction the 2009 Population and Housing Census for Solomon Islands was allowed to be undertaken; Mr Shadrach Fanega, the Permanent Secretary, Ministry of Finance and Treasury for his greatest understanding, unwavering support and patriotism for this national project, in seeking, advising and maintaining the census project funding requirements as per his budgetary support throughout the census project; Mr Martin Butterfield for his initial contribution on the strategic census planning and management; Ms. Elizabeth Kausimae the Under Secretary (US) Finance, Ministry of Finance and Treasury, as chairperson of the Census Population Management Committee (CPMC), for her leadership and coordination of the committee. To all the members of the committees, for their valuable contributions and suggestions, in making the census operations work efficiently.

Many thanks are extended to the Secretariat of the Pacific Community (SPC) for the technical assistance initiated and provided. Firstly to the Demography and Statistics Programme Manager, Dr. Gerald Habercorn, for his leadership and management support of SPC assistance; to SPC Demographer, Mr. Arthur Jorari, for his worthwhile assistance in reviewing the census training manual and training, advise and contribution in the overall census operations, to GIS Specialist, Mr. Phil Bright, for setting-up the scanning program and management of the system, to GIS Specialist, Mr. Scott Pontifex, for setting-up the mapping system and training the local cartographer, to the Data processing Specialist, Ms Leilua Taulealo, for her technical support in data management and tabulation, to Mr. Pierre Wong for his technical support and contribution in data imputation and finally to the Population Analyst, Mr. Andreas Demmke for the data analysis and assistance in the completion of this report.

Sincere thanks to the Census Technical Advisor, Mr. Allan Harbrow for his advises in the planning and management of the 2009 Census and to his wife Mrs. Maureen Harbrow for her assistance in the census operation; to the former Census Commissioner Mr. Willington Piduru and new Census Commissioner Mr. Douglas Kimi for their respective coordinated effort to the success of the 2009 census. To the donor partners the Australian Government through AusAID; the European Union (EU); United Nations through UNFPA and UNDP, ROC for financial assistance in the various operational activities of the census project; the Solomon Islands Broadcasting Cooperation (SIBC) and to Solomon Islands One News Television for the publicity programs; the Surveyor General and his staff, Ministry of Lands, for their assistance in providing digitized maps of Solomon Islands; the Census team and the rest of the staff of the Statistics Division, for their valuable contributions offered to the 2009 Census project work-plan. To all census workers, ranging from the census office staff (both direct and seconded employees) to the field staff, your involvement, though not smooth-taken is particularly appreciated as you have all contributed to the overall achievements made in the implementation of the 2009 census project. Finally, to all the people of Solomon Islands for their generous responses to the questionnaires, your contribution is of vital importance in making the 2009 Population and Housing Census of Solomon Islands a success.

As chairperson of the Users and Steering Committee, and in my capacity as Government Statistician (Ag) I was happy to lead and coordinate both the committee and the census project implementation, since its planning stage to the data processing stage, thus making all census work plans and activities possible and achievable.

Thank you.

Part 2: Table Specification

The tables included in this summary report represent the questionnaire of the Solomon Islands 2009 population and housing census. Exclusively the tables are processed with the assumption that they can be used by wider audience, however they are specifically meant for users with some statistical background such as planners, researchers, specialists, and donor representatives.

The set of tables presented here adheres to United Nations principles and recommendations for population and housing censuses and the standard of comparability with the previous censuses.

Though there were slight changes to the numbering and ordering of the tables in each group and the titles may have been changed due to the structure and the format of the tables processed. It is important to note that table numbering starts with a 'P' for person tables and 'H' for household tables.

This volume contained 97 tables distributed into major groups, the persons and the household tables. The person tables comprises of 71 tables and 26 household tables. The person tables are further divided into 8 various subject matters.

1. Geography
2. Age structure
3. Social characteristics
